PS43 FOUNDATION | BUILDING BRIDGES TO EDUCATION

41%

of 5-year-olds in Cameroon are enrolled in education. Poverty and access are the barriers.

PS43 FOUNDATION

PS43 Bridge

Map school readiness, deliver learning kits, and prove the impact, even offline.

Team 14 | Alex · Ruslan · Nebinson · Abhirami

Help can’t reach what it can’t see

The challenge

Six linked barriers keep devices and funding from reaching classrooms.

Who is affected

Children, teachers and school heads, plus PS43 staff in two countries.

Why today’s way fails

Manual research and referrals are slow, costly and hard to compare.

1. **Identify needs**
2. **Find resources**
3. **Trusted partners**
4. **Weak power & internet**
5. **Coordinate projects**
6. **Measure impact**

Only 16% of public preschools in Cameroon have electricity: devices alone are not enough.

One platform, from survey to learning

Admin map

Every school on one map, coloured by readiness. Decide who gets the next kit and track each shipment.

Field tools

Coordinators survey schools, scan device QR tags, confirm deliveries and count devices monthly.

Learning & curriculum

Offline lessons and a curriculum plan, so devices become learning, not storage.

Built for school coordinators and PS43 admins, offline first.

How it works in four steps

1 Survey

A coordinator answers five questions: power, signal, pupils, teachers and a room that locks.

2 Prioritise

Answers give a readiness tier (0 to 3) and a need score. The map shows who needs a kit most.

3 Deliver

The right kit for the tier ships. Each device is scanned; the teacher confirms arrival.

4 Learn

Students learn, even offline. Only school totals come back, never names.

Map colours Tier 0 | Tier 1 | Tier 2 | Tier 3 *low readiness to device-ready*

ONE DASHBOARD, FROM NEED TO DELIVERY

PS43 Bridge · Admin Map

1 SEE WHAT'S STUCK

Delays flagged automatically

2 TEACHER REQUESTS

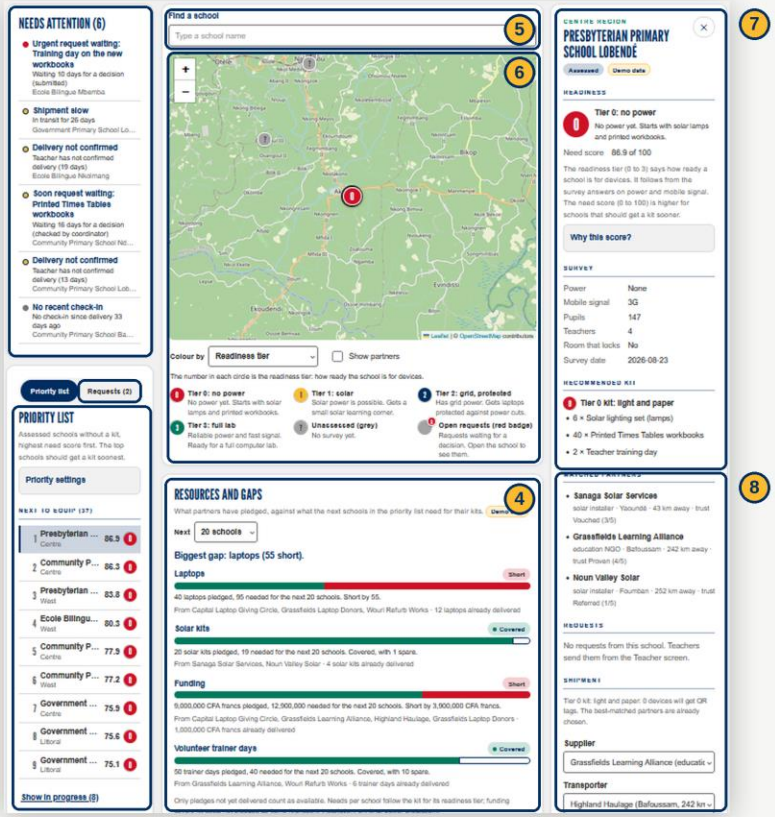

All requests in one place

3 KNOW WHO'S NEXT

Schools ranked by need

4 CONNECT RESOURCES

Pledges matched to needs

5 FIND ANY SCHOOL

Search and jump to it

6 SEE EVERY SCHOOL

Mapped by readiness

7 KNOW EACH SCHOOL

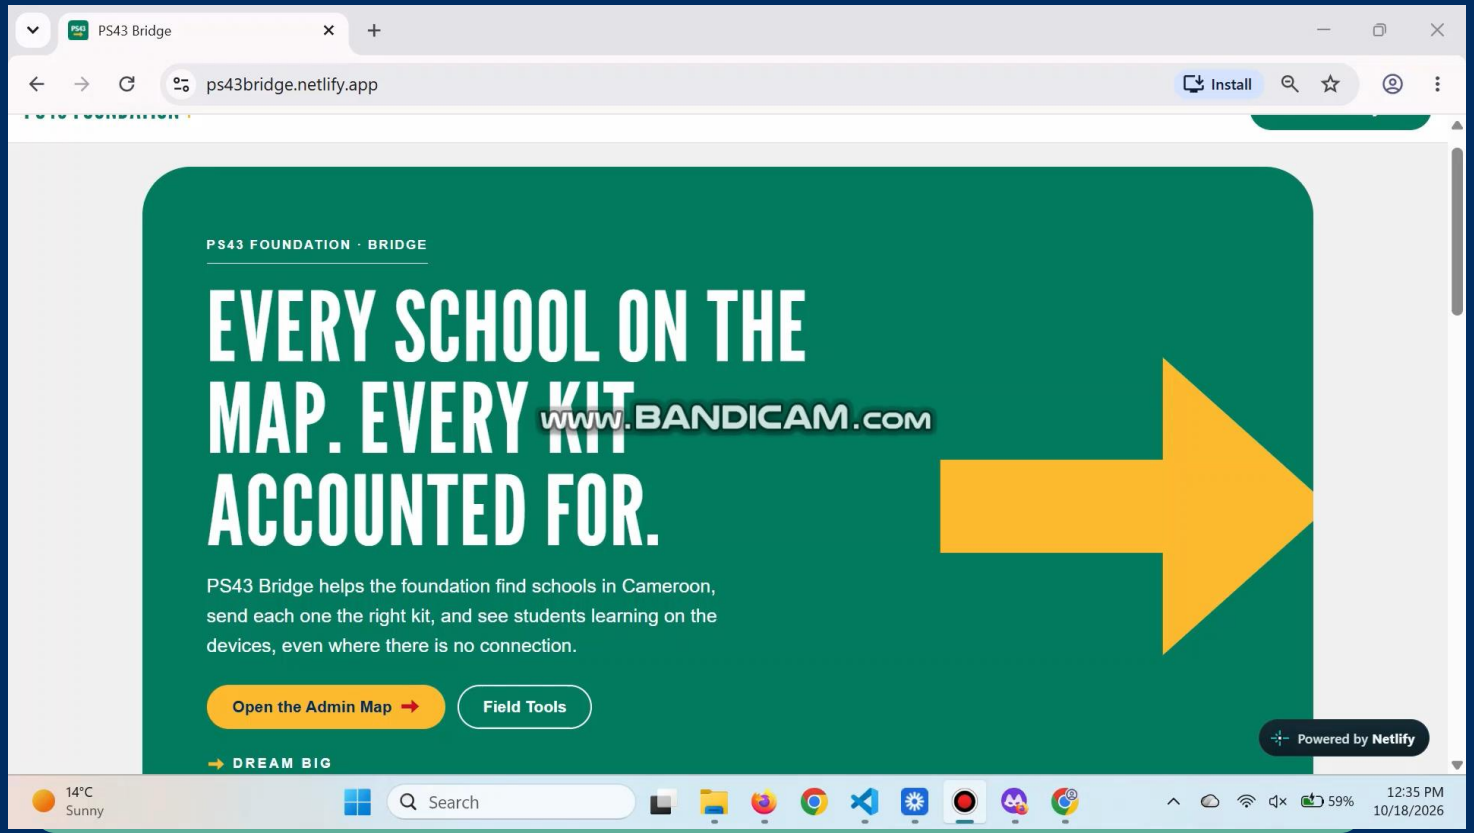

Survey and score explained

8 MATCH PARTNERS

Right kit, trusted partners

Demo data. School locations from OpenStreetMap; school names, partners and figures are fictional.

Benefits of the Program

Clear priorities

Comparable scores show where help matters most.

Faster decisions

One shared view for the Canada and Cameroon teams.

Stronger trust

Partners are checked before funds or equipment move.

Safer payments

Two-key approval and a clear record for every payment.

Less manual work

Templates replace chasing messages and spreadsheets.

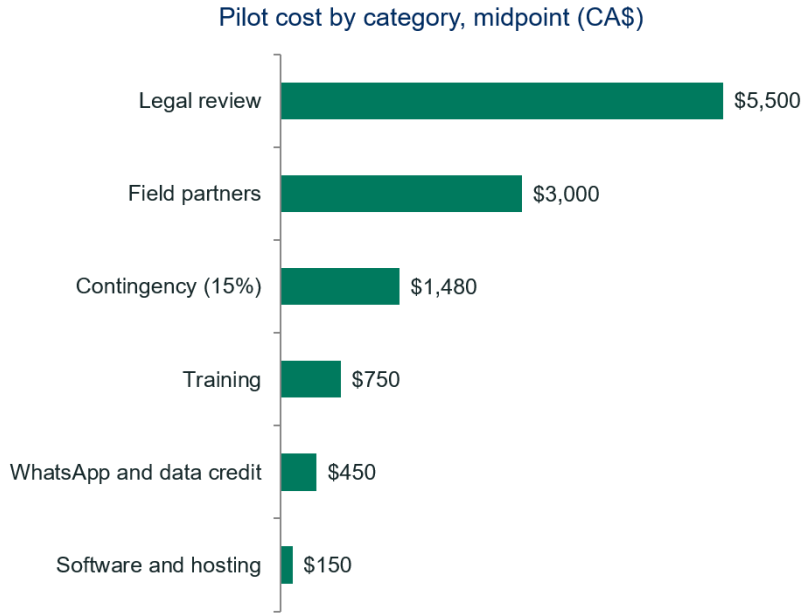

Proof of impact

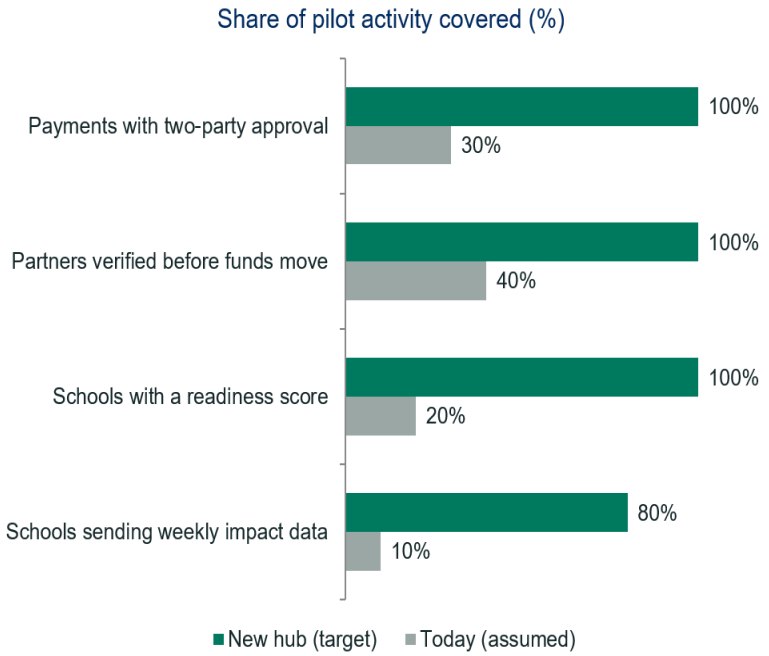

Weekly check-ins compared with each school's starting point.

Low cost, scalable

Free-tier tools now; add schools and regions later.

Faster, cheaper, wider reach

Pilot: 3 to 5 schools, 12 weeks, **CA$7k to 16k.**

41% is a starting line

3x

more children reached in PS43-supported schools by 2028 (+200%)

Target vs. today's baseline in PS43-supported communities.

- See where help matters most
- Deliver kits that actually work
- Prove the impact of every dollar

"If you want to go fast, go alone. If you want to go far, go together."
African proverb

So what? Every child we reach starts with a school we can see.
